## WORK EXPERIENCE

### Mobile Developer

#### PT. Qoin Digital Indonesia

April 2024 – Present | Jakarta (Remote)

- Developed scalable, testable, and maintainable code of LAZIZ NU and Digital Korlantas Porli apps for Android and iOS using Flutter Technology.
- Assist publishing app to App Store and Play Store, ensuring it is accessible to wide audience on Android and iOS platforms.
- Developed strong debugging skills by addressing issues identified during QA testing phases promptly and effectively.
- Implemented robust security measure to protect user data and maintain application integrity.
- Implemented analytics tools within mobile apps to track user behaviour patterns.

### Mobile Developer

#### Venturo Pro Indonesia

August 2023 – Present | Malang, Indonesia (On-Site)

- Developed Mobile App Youniverse, Developed Mobile App and Web Version of Komune Camp using Flutter Technology.
- Integrated third-party APIs to enhance application functionally and create seamless user experiences.
- Implement robust security measures for mobile applications, safeguarding sensitive data from potential threats.
- Collaborated with cross-functional teams to develop innovative solutions for complex client requirements.
- Increase app store ratings by consistently delivering high-quality updates and improvements based on user feedback.
- Developed web versions of the app using Flutter web.
- Developed responsive layouts for optimal viewing across various screen sizes and devices.

### Fullstack Developer

#### PT. Adma Digital Solusi

July 2022 – August 2023 | Surabaya, Indonesia (Remote)

- Integrated third-party APIs into mobile apps to extend functionality and improve overall usability.
- Worked closely with teams to meet deadlines, prioritize tasks, and deliver high-quality software products using Scrum development methodology.
- Developed new features and functionalities for mobile apps, enhancing user experience.

- Developed RESTful APIs that facilitated seamless data exchange between mobile applications and servers in a distributed environment.
- Developed algorithm using Simple Additive Weighing (SAW) algorithm.
- Built databases and table structures.

## Fullstack Developer

### Self-Employed

January 2022 – July 2024 | Malang, Indonesia (Remote)

- Developed a dynamic web-based company profile, a POS application integrated with Bluetooth printers, and an admin management application for efficient data handling and detailed cash flow reporting.
- Developed a Production Inventory Application using Flutter for the frontend and Laravel for the backend, featuring CRUD functionalities, notifications, and Excel data export.
- Designed and developed an E-Wallet Application for managing finances, using Flutter with BLoc state management and a web CMS with Laravel integrated with the Midtrans payment gateway.

## EDUCATION

---

### Bachelor of Applied Information Engineering (S.Tr.Kom.)

State Polytechnic of Malang | GPA : 3.76 / 4.00

August 2019 – August 2023

## PROJECTS

---

- **Digital Korlantas Porli**  
Ease of service for the Indonesian Police Corps in one application.
